Production & Quality

Raw material

To make finest sanitary ware products it requires a quality and standard inspection of raw materials. We have made a standard quality bench mark to use raw material for making our finest iconic products.

With challenges in modern design we ensure that all raw material must go through complete quality procedure so it gives foundation of an excellent product. This brings out the true essence of sanitary ware products.

Quality procedures

In our production line our crafters follow all the quality procedure to ensure that our product becomes the centre of attraction. With certain quality criteria our products are one of the best & preferred in the market.

A quality process with visual reference that contain the trace of craft and shape to memorize the iconic products and reinvent the theme of bath space design.

The right kind of quality service that's differentiate us from others Let our quality products exceed your expectations.

Production

Always committed to interpreting new tastes and trends, Our Sanitaryware looks to the future with continuous innovation of its process and products. This requires the integration of different skills, from the design to engineering, from chemistry to logistics, from marketing to sociology. The company has always paid great attention to saving energy and protecting the environment.

It is constantly evolving in order to continuously improve the functional performance and aesthetics of its collections. The wide range of shapes, sizes, colours and methods of installation of its products allows satisfying the different tastes and requirements of customers in a safe and precise manner.

WALL HUNG BASIN

As per shown in the picture, the rag bolt must be grouted into the cement/concrete wall. The bolts must be fixed to the cement/concrete wall. Allow setting & checking than install it using nut and washer.

COUNTER WASHBASIN

At the beginning

1. A skilled or experienced person should install counter lavatories.
2. Avoid using adhesive with this product.
3. Check the waste area and supply tubing if required.
4. Do not open the lavatory from its protective carton until you are ready for installation.
5. Please follow all local building and plumbing codes.

MATERIAL & TOOLS

Measure tape, Keyhole or saber saw, Hammer, Glasses, Rags or Paper toweling, Drill (1/2 dia, drill bit or larger), Pencil, sealant, sharp knife or scissors.

INSTALLATION OF LAVATORY

Please Note : Please install it in a way that future removal from underneath the counter top is possible without damaging the counter top.

1. Please check the desired location for clearance between the back splash, faucet, Fixture and cabinet.
2. Please cut the template.
3. Please carefully trace the template on the counter top directed.
4. Please mark the faucet hole centerline on the counter top.
5. Please drill a 1/2" pilot on the inside of the cut line.

For Wood Counter tops:

1. Mark and pre-drill the wood screw holes at the locations shown on the template.
2. Waterproof any exposed areas of wood.

For Marble Counter tops:

1. Position the counter top upside down on foam padding to protect the surface. Mark and drill 3/6" holes 5/8" deep at the locations shown on the template.
2. Use a setting tool and hammer to secure the anchors.

For All Installations:

1. If the counter top has not been installed, install it at this time.
2. Drill the faucet holes according to the faucet installation instructions.
3. Install the faucet to the counter top according to the manufacture's instructions.
4. Install the drain to the lavatory according to the manufacture's instructions.

MAINTENANCE

Like any other part of your house, the bathroom can be made to look great and made to last long if it is taken care of regularly. To make your bathroom beautiful here are some invaluable tips.

Wash Basin :

A mild detergent can be used to wash the basin at least once a day. After washing, the basin should be wiped out clearly to avoid water stains.

Closets :

Cleanser like Harpic can be used to clear the closet with soft plastic brush, at least once a day.

To avoid minute discoloring, after flushing the toilet give it a once over with the soft brush.

Keep the toilet brush handy in a convenient stand nearby.

In case of toilets and basins, if there has been no maintenance since long period of time, water deposits and discoloration can form on the surface of areas that get wet. In such cases, these stains/marks can be removed with the help of a solution of dilute hydrochloric acid.

Clean with a soft cotton cloth and warm water with soap.

Do not use thinner, day cleaning liquids or powder paste. Use a liquid cleaner at least twice a week.

Use brass or car rubbing compound and then polish with a cloth to remove fine scratches.
